MARUTENDRA PRATAP SINGH

Java Backend Developer • Internship Seeker

marutendrapratapsingh627@gmail.com | Greater Noida, Uttar Pradesh | LinkedIn | GitHub | Portfolio

OBJECTIVE

Third-year B.Tech (CSE) student at AKTU with a strong foundation in Java backend development. Experienced in building REST APIs, implementing Spring Security with JWT and OAuth 2.0, and working with both SQL and NoSQL databases. Familiar with microservice basics (service-to-service calls using OpenFeign). Looking for a backend developer internship to contribute to real-world projects and grow alongside a strong engineering team.

TECHNICAL SKILLS

Languages	Java (Primary), C, Python, HTML, CSS
Backend Framework	Spring Boot, Spring Security, Spring Data JPA
Microservices (Basic)	OpenFeign (Feign Client) for service-to-service communication
Databases	MySQL, MongoDB
ORM / Persistence	Hibernate, JDBC, Spring Data MongoDB
Authentication	JWT (JSON Web Token), OAuth 2.0, RBAC
Testing	JUnit 4 & 5, Mockito
Tools & DevOps	Git, GitHub, Docker (basic), Postman, IntelliJ IDEA, VS Code
Core Concepts	OOPs, Exception Handling, Multithreading, Collections, REST APIs

PROJECTS

E-Commerce Microservices Backend | *Spring Boot · Microservices · Eureka · OpenFeign · JWT · MongoDB · REST APIs* Github

- Built an e-commerce backend as three microservices (User, Order, Seller), each with its own MongoDB database.
- Used Eureka Server for service discovery and OpenFeign with Request/Response DTOs for inter-service REST communication.
- User-Service: JWT authentication, user management and cart operations (add item, update quantity, remove item, view cart).
- Order-Service: order creation from cart, history, status and cancellation; updates stock via Seller-Service.
- Seller-Service: seller signup/login, product add/update, category management and stock management.

Railway Reservation System | *Spring Boot · MongoDB · JWT · Spring Security · REST APIs · Frontend (HTML/CSS/JS)* Github

- Built a full-stack railway reservation system; backend architected and implemented end-to-end independently.
- Developed REST APIs for ticket booking, seat availability, train search, and real-time PNR status tracking.
- Implemented JWT authentication with role-based access, with separate flows for passengers and admin users.
- Admin panel APIs handle train management, schedule updates, and booking oversight with protected endpoints.

Hotel FrontDesk System | *Spring Boot · Spring Security · MongoDB · JWT · OAuth 2.0 & RBAC · Lombok* Github

- Designed and built a REST API-based hotel management system supporting Admin, Staff, and Guest roles.
- Implemented JWT-based stateless authentication and OAuth 2.0 social login for secure access.
- Applied Role-Based Access Control (RBAC) using Spring Security to restrict endpoint access by role.
- Used MongoDB for flexible document storage of bookings, rooms, and user data.

User Expense Tracker | *Spring Boot · MongoDB · JWT · OAuth 2.0 · REST APIs* Github

- Built a full CRUD REST API for personal expense management with user-level data isolation.
- Secured all endpoints with JWT authentication and implemented OAuth 2.0 for third-party login.
- Structured expenses by categories and date ranges with filtering support via query parameters.

Email Service API | *Spring Boot · Gmail SMTP · REST API · Deployed on Render* Github

- Created and deployed a production REST API endpoint for sending emails via Gmail SMTP.
- Added request validation and SMTP authentication; used as a backend contact-form service, live and publicly accessible.

CERTIFICATIONS

- Getting Started with Artificial Intelligence, IBM SkillsBuild
- Spring Boot, IBM SkillsBuild

EDUCATION

Bachelor of Technology, Computer Science & Engineering 2024 – 2028 | SGPA: 7.4+
Accurate Institute of Management and Technology, Greater Noida (AKTU)

Class 12 — New Standard Public School, Raebareli 2023 | 77%

ACHIEVEMENTS & ACTIVITIES

- 2nd Place, Ideathon 1.0, AIMT College Level (inter-department technical competition);
- participated in Virtual Hackathon organised by Amity University.
- Member, Pirates of Code (Coding Club), AIMT;
- actively solving DSA problems on LeetCode;
- active GitHub profile with multiple backend repositories.
